

ISHTIAQ AKANDA

New York, NY

(929)-450-9108 • ishtiqa2003@gmail.com • github.com/ishtiqa1 • ishtiagakanda.dev/ • linkedin.com/in/ishtiqa-akanda/

TECHNOLOGIES

Languages: Python, JavaScript, SQL, PHP, Scala, HTML5, CSS3

Libraries/Frameworks: ReactJS, NodeJS, ExpressJS, ChartJS

Tools & Testing: Linux, Git, Github, Tableau, MySQL, PostgreSQL, phpMyAdmin, XAMPP, Figma

SOFTWARE PROJECTS

US Economic Dashboard [Github](#)[Deployment](#)

Feb - Mar 2026

An economic dashboard that implements data from the FRED (Federal Reserve) API

- Engineered a full-stack dashboard that solved the complexity of raw FRED API data by implementing interactive Chart.js visualizations, resulting in a streamlined tool for performing real-time macroeconomic analysis.
- Developed a custom RESTful backend using Express to bridge the gap between complex government data structures and a React frontend, which automated the data-fetching pipeline.

MangoHub Anime/Manga Dashboard - [Github](#)[Deployment](#)

Feb 2026

A dynamic frontend application providing access to a database of anime and manga.

- Engineered a framework-free UI/UX using Vanilla JS and DOM manipulation, implementing interactive modals and dynamic content rendering while maintaining a lightweight, zero-dependency codebase.
- Integrated the Jikan REST API to fetch and display a live anime/manga database, building a client-side search and filtering engine that delivers instant results across large datasets.

Mahjong Game - [Github](#)[Figma](#)[Development](#)

Feb - May 2025

An interactive American Mahjong game.

- Led the implementation of front-end features using ReactJS and back-end functionalities through PHP and SQL, resulting in a seamless gaming experience that supported over 100 concurrent users.
- Resolved real-time state synchronization challenges in a multiplayer environment by integrating persistent database triggers, eliminating race conditions across concurrent sessions.

EDUCATION

Software Engineering Fellowship - The Marcy Lab School

Brooklyn, NY | Sep 2025 - Present

Completing 2,000+ hours of intensive coursework in computer science fundamentals, leadership development, and full-stack web application development using the PERN stack (PostgreSQL, Express, React.js, Node.js).

Candidate For Computer Science BA (100+ Credits) - University at Buffalo

Buffalo, NY | Aug 2021

Data Structures, Algorithms, Software Engineering, Microeconomic Theory, Macroeconomic Theory, Economic Statistics

EXPERIENCE

Assistant - Susan E Wagner Day School

Bronx, NY | Jul 2023 - Aug 2023

- Supported staff in implementing educational activities and behavioral management strategies, contributing to an increase in classroom productivity.

Data Operations Intern - Safe Medical Care

Bronx, NY | Dec 2020 - Feb 2021

- Processed and validated 500+ patient records into a clinical EHR portal, enforcing data integrity standards that reduced processing errors and decreased record retrieval time by 30%.
- Analyzed patient intake workflows alongside a 3-person team, identifying scheduling bottlenecks that improved appointment throughput by 20%.
